

The development of optical fiber to the subscriber throughout the territory is now becoming a problem for regional planning and business competitiveness at the national and european levels.

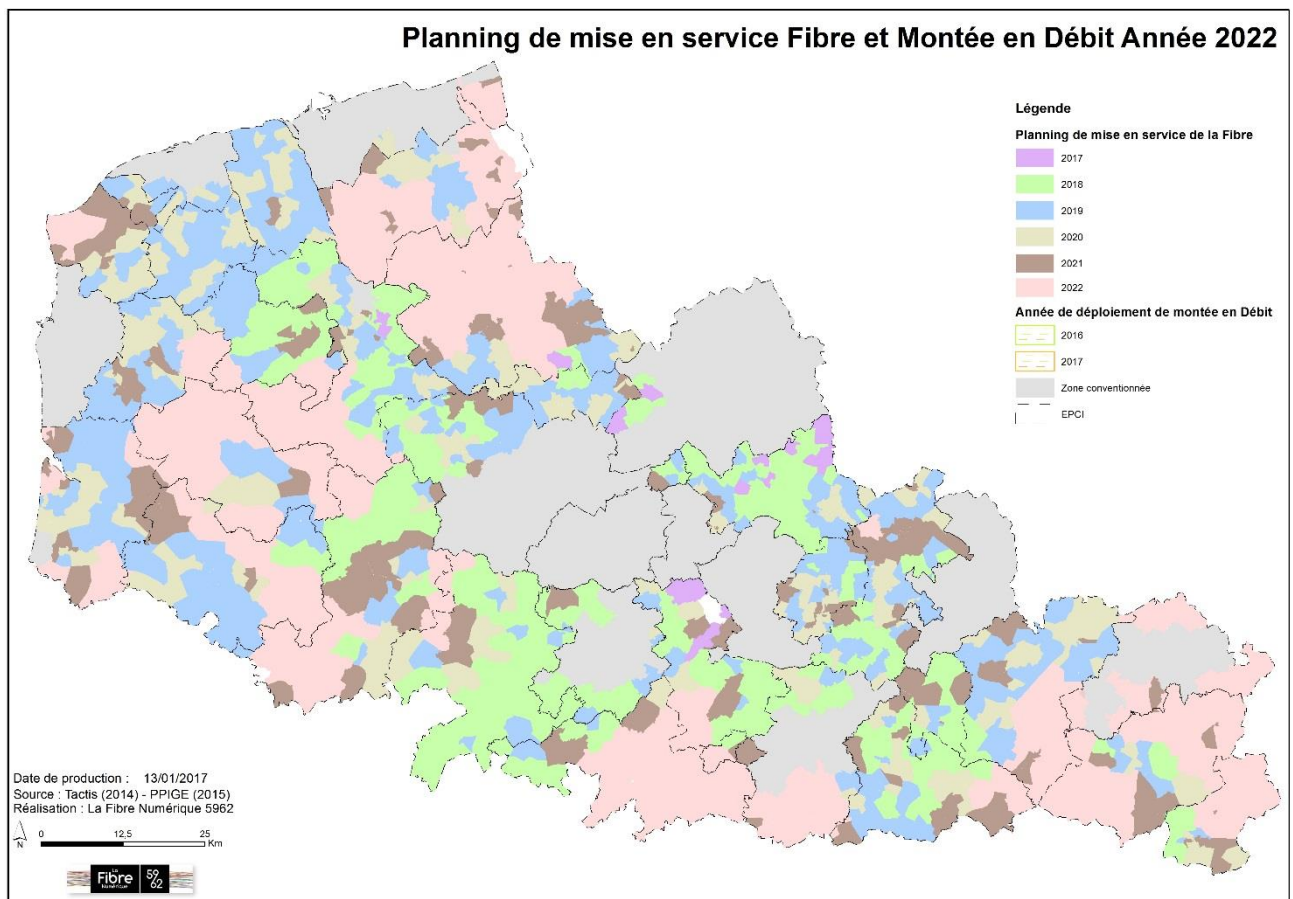

With the creation of Fiber Numerique 59 62, the Regional Council and the Nord and Pas-de-Calais Departments have equipped themselves with a tool to bring high-speed Internet to all inhabitants of the Nord and Pas-de-Calais Departments.

Following a logic of equitable regional development, economic development and the effectiveness of public policies and services, the Syndicat was mandated by its three founding members to :

- Follow deployments in the 387 municipalities or Orange and SFR-Numéricâble have declared an intention to invest.
- Deploy fiber optics in the 1,159 municipalities where these operators did not show any intention to invest.

Discover, here in this web site, in a few maps, the deployment program.

DETAILS OF DEPLOYMENTS ENVISAGED

- ✓ The most structuring regional project of the decade in terms of spatial planning and attractiveness, target population and economic development,
- ✓ The most ambitious project in France, in terms of the pace envisaged and the number of optical connectors in the so-called "public" area (1/3 of the catch),
- ✓ A unique project management entrusted to the Syndicat Mixte "La Fibre Numérique 59 62"
- ✓ A Public Service Delegation entrusted to the AXIONE-Bouygues Energies and Services-Caisse des Dépôts and Mirova group,

- ✓ A financial mechanism of nearly 1 billion euros mobilizing public funds and private funds, including the European Investment Bank,

- ✓ A contribution of € 53 million from the french State,

- ✓ For intercommunalities, 68 € instead of 168 € the optical connector in each house or enterprise.
- ✓ 1,159 communes to be covered in fiber optics : 700,000 homes, businesses and public establishments,
- ✓ The Triple Play minimum for all by 2020 (internet, telephone, TV), of which 80% is fiber;
- ✓ 18,500 km of cables to deploy in 6 years instead of 10 ;
- ✓ 2,600 jobs to be occupied to build the network, including 300,000 hours of integration.
